Summary

Early-career Full Stack & Front-End Developer with hands-on experience in software development, QA testing, digital twin visualization, and responsive web design through an AI startup environment. Experienced in developing scalable web applications using Laravel, Next.js, TypeScript, MySQL, and cloud deployment platforms. Strong background in Android/iOS manual testing, UI/UX design, and building modern digital experiences with a focus on usability, adaptability, and fast execution.

Skills

Frontend: HTML, CSS, JavaScript, TypeScript, Next.js	Backend: PHP, Laravel, Javascript	Databases: MySQL, PostgreSQL, Firebase (Basic)	Visualization & Mapping: Three.js, Mapbox GL, Deck.gl
Cloud & Deployment: AWS Amplify, Railway	Testing & QA: Manual QA Testing, Regression Testing, Mobile Testing (Android/iOS)	Design Tools: Wix Studio, UI/UX Design, Responsive Design, Figma	

Experience

Xeleqt AI	Cebu City, Philippines
Software Development, QA & Visualization Intern	March 2026 - June 2026
- Developed responsive web interfaces using Next.js, React, TypeScript, HTML, and CSS, contributing to production-ready company website development. - Designed early-stage UI/UX layouts using Wix Studio and transitioned designs into fully coded web applications. - Supported marketing and product website development by implementing user-friendly, mobile-responsive landing pages. - Performed manual QA testing for Android and iOS applications, including regression testing and cross-device validation (online/offline functionality). - Reported bugs and usability issues during sprint cycles using internal team communication tools. - Contributed to digital twin visualization systems using Three.js, Mapbox GL, and <u>Deck.gl</u>, supporting real-time asset rendering and diagnostics dashboards.	

Projects

One Tap — HOA Management Platform
Full Stack Developer Capstone Project
- Developed a scalable homeowners association platform featuring issue reporting, facility reservation, notifications, and AI-powered assistance. - Built a full-stack web system using Laravel, JavaScript, PHP, HTML, CSS, and MySQL. - Implemented multimedia issue reporting with image, audio, and video support. - Developed role-based dashboards for Super Admin, HOA Admin, HOA Officers, and Residents. - Contributed to deployment and production hosting using Railway.
Digital Twin Visualization Platform
Front-End / Visualization Developer Internship
Developed interactive digital twin visualizations for real-world assets using Three.js, Mapbox GL, and <u>Deck.gl</u>.

- Implemented real-time rendering and diagnostics interfaces for monitored devices and infrastructure assets.
- Collaborated with cross-functional teams to support AI-powered visualization systems.

Company Website Development

Front-End Developer | Internship

- Designed and developed responsive company web interfaces using Next.js, TypeScript, React, HTML, and CSS.
- Created mobile-responsive designs initially through Wix Studio before transitioning to code-based implementation.
- Contributed to deployment workflows using AWS Amplify.
